

RT1 - 750kg

Single Axle Unbraked Trailer

Trailer chassis is suitable for most brands of generators and other static plant such as tanks, pumps, compressors and other.

Optional extra: Pin hitch

Features

- Ready for work rolling chassis
- Towable chassis is fully certified and approved and is recorded on a data base in accordance with Regulation 2007/46/EC
- Open frame design
- The design is approved for various load fastening variations
- Chassis is complete with mudguards and rear lights

Benefits

- Simply load and secure your equipment and go
- No further testing or certification is required as the standard issue certification satisfies all the elements of trailer legislation and chassis can be legally and safely towed with, or without a payload
- Simply fasten and secure your generator or equipment on and off the chassis with ease
- Choose from ratchet straps or nut and bolts fasteners as both are acceptable
- Trailer is suitable for UK and Ireland highway use
