

MHM LOAD BANK 3

38kVA Generator Portable Load Bank

This portable dual voltage generator load bank is an essential piece of generator test equipment, designed to offer portable, easy, simple and efficient voltage, frequency and amperage load testing of a generator.

Tests up to
38kVA

Features

Maximum test load:
3ph (400v) = 38kVA / 30kW
1ph (230v) = 19kVA / 15kW

Load bank tester displays voltage (v), frequency (Hz) & amperage (A) under both load and no-load conditions

Portable unit, complete with 2 x castor wheels and 2 x handles

Plug and play connectivity

Benefits

Ideal to load & test a fleet of generators up to 38kVA

Allows test engineer to ensure correct setting of generator

Ideal for workshop or mobile engineer

Load bank comes complete with 1 x 400v (63A – 1.5m) + 1 x 230v (63A – 1.5m) generator to load bank test leads

IMPORTANT NOTE: This load bank tester will load and test the generator. No further equipment is required.

Specification

Performance

Single Phase Power (230V)	19kVA/ 15kW	Three Phase Power (400V)	38kVA/ 30kW
---------------------------	-------------	--------------------------	-------------

Dimensions

Length: 840 mm	Width: 400 mm	Height: 560 mm	Weight: 30 kg
----------------	---------------	----------------	---------------

Socket Configuration	3ph (400V)	1ph (230V)
	63A	63A
MHM Load Bank 3	1 x Plug	1 x Plug
Test Leads Configuration (3m)	3ph (400V)	1ph (230V)
	63A	63A
MHM Load Bank 3	1 x Plug + 1 x Socket	1 x Plug + 1 x Socket
