

MHM LOAD TESTER 1

6kVA Generator Portable Tester Only

This portable dual voltage generator test centre is an essential piece of generator test equipment, designed to offer portable, easy, simple and efficient voltage, frequency and amperage load testing of a generator.

Tests up to
6kVA

Features

Maximum test load: 6kVA / 4.8kW
(230v + 110v)

Tester displays voltage (v), frequency (Hz) & amperage (A) under both load and no-load conditions

Lightweight, portable and complete with carry handle

Plug and play connectivity

Benefits

Ideal for testing a fleet of generators up to 6kVA

Allows test engineer to ensure correct setting of generator

Ideal for workshop or mobile engineer

Load tester comes complete with 1 x 230v (16A – 3m) + 1 x 110v (16A – 3m) generator test leads

IMPORTANT NOTE: This is a tester only. A load needs to be applied to run a full generator test. To load the generator for testing, hire fleet equipment can be used, such as fans, heaters, blowers or other.

Specification

Performance

Single Phase Power (110V)	6kVA/ 4.8kW	Single Phase Power (230V)	6kVA/ 4.8kW
